

29th October and 6th November 2020 ALLIANCE4TECH Winter School on ENGINEERS WITH SOCIAL AND ECOLOGICAL RESPONSIBILITY

Blue Engineering

Sustainability in the curriculum of engineering students is either ignored or solely focuses on technological solutions. As the UNRio+20 debate and its focus on Green Economy shows, there is a strong demand for technological innovations as a remedy for ecological destruction and as pathway to poverty eradication. Consequently, the predominant belief in technological progress is held up through technicians as well as a society wishing for easy technological solutions for complex ecological and social problems. Taking this into account this winter school promotes socially and ecologically responsible engineering through a variety of alternative teaching methods.

Organizer:

Blue Engineering Group

**Faculty V of Mechanical
Engineering and Transport
Systems, Technische
Universität Berlin**

Dr.-Ing. André Baier

**Location: Video Conference
via Zoom**

Program*:

29th October

10.00 – 11.30 Technology
Assessment

13.30 – 15.00 Responsibility of
Engineers

6th November

10.00 – 11.30 Arts and Technology
// Society-Nature Relations

13.30 – 15.00 Group presentations
