

EXCHANGE PROGRAM 2021-22
SPRING SEMESTER "S8"

I) CENTRALESUPELEC'S ENGINEERING CURRICULUM

CentraleSupélec is a French *Grande Ecole*. Our Engineering Curriculum spans over 3 years (6 semesters).

Each semester comprises 2 terms:

- an "Engineering Challenge" Term (in French *Séquence Thématique* or "ST");
- an Academic Term (in French *Séquence Générale* or "SG").

CentraleSupélec Engineering Curriculum in relation to the French/European system				Equivalent in the European higher education system
Preparatory classes in France: "Prépa"	1st year	Semester 1		year 1
		Semester 2		
	2nd year	Semester 3		year 2
		Semester 4		
	CentraleSupélec Engineering Curriculum	Semester 5 - S5	SG 1	BSc
			ST 2	
		Semester 6 - S6	SG 3	
			ST 4	
		Semester 7 - S7 FALL	ST 5	
	2nd year		SG 6	year 4
		Semester 8 - S8 SPRING	ST 7	
			SG 8	
	3rd year	Semester 9 - S9	SD9	MSc
			SM 10	
		Semester 10 - S10	SM11	
			Internship	

Most of the exchange students are welcomed in the second year of the Engineering program, either during the Fall Semester "S7" (September to January) or the Spring Semester "S8" (February to June), or both.

Below you will find more information on the organization of the Spring semester and the list of courses available during this period.

Detailed course descriptions can be found in the catalog 2021-2022.

To know the language of instruction for each course, please refer to the course list below.

Please note that changes can still occur before your arrival.

II) SPRING SEMESTER ORGANIZATION

You are free to select any course from this program, taking into consideration several rules explained below. The full course load of the engineering program is usually 30 ECTS per semester. Depending on the requirements of your home institution, you may either take the full course load, additional courses, **or choose a minimum of 20 ECTS.** Please note that we have 3 campuses: Saclay, Rennes and Metz. **Be sure to choose a full set of courses in one campus only.**

This document is for information purposes. Course choices will be collected online via a link sent to all nominated candidates.

“Engineering Challenge” Term, or Séquence Thématique related to Optimization: ST 7

This term runs from February to late March, and comprises:

- **A course series including:**
 - An introductory module
 - A specific course
 - A short project, in French *Projet de Séquence* (**choice of short project will be made upon arrival**)
- A common course: **Optimization**

Students interested in the Engineering Challenge Term are invited to choose 1 of the 12 “ST” topics, as well as a back-up in case their top choice cannot be accommodated.

The Optimization course is not mandatory, but the concepts covered in this course are important to follow the ST. If you don't want to take it, make sure you have taken a similar course at your home university.

An Academic Term, or Séquence Générale: SG8

This term runs from April to mid-June, and comprises:

- **Up to 3 elective courses**

The courses are distributed in 3 series: 2.4, 2.5 and 2.6. All courses from a given series are scheduled in the same time slot. If you are interested in 1, 2 or 3 elective courses, **please select 1 “top” choice + 1 “back-up” per series.**

The semester also includes:

- An **S8 Project** (different from the short project mentioned above) that runs over the whole semester. Students will be offered a list of topics to choose from before the beginning of the semester.
- **Workshops:** Engineering Skills Workshops (“API”) and Professional Practice Skills Workshops (“APP”). **The “API” workshops are mandatory for students involved in a long project. The “APP” workshops are mandatory for all students.**
- An **intensive 1-week seminar** scheduled mid-June. If you are interested in this seminar, you may select:
 - One course related to a Humanities and Social Sciences topic (labelled **2IN2310, 2IN2320, 2IN2330, 2IN2340**). In this case, you will be requested to choose a specific module within the topic at a later stage **OR**
 - An additional elective course (related to: Physics, Management, Computer science, etc.).**Please also select a back-up choice, as your top choice may not be accommodated.**
- A **Philosophy** course.
- **Language courses:** Students can choose up to 2 foreign language(s) from the list. **Priority is given to French and English.** If you are already fluent in the latter, you may skip the language courses, or choose another language. **This option is available only if you have already had at least two semesters of study of the chosen language just prior to your arrival at CentraleSupélec, as beginner-level groups are not available during the Spring.** You cannot choose a language of which you are a native speaker.
- **Sports:** CentraleSupélec offers a range of sports courses which international students are encouraged to join, but for which they do not receive ECTS. If you are interested, please visit the Sports Office when you arrive on campus.

III) SPRING SEMESTER COURSE LIST

You can use this table to build your study plan before answering the online survey.

F: French E: English

SEQUENCE THEMATIQUE "ST 7" / ENGINEERING CHALLENGE TERM
